The importance of schools, health posts, community buildings, drinking water schemes, irrigation canals and other physical assets in community development is paramount. Good Neighbors International (GNI) has been working in Nepal since 2002 and invested in numerous vital civil projects in underserved and hard-to-reach pockets in Province No. 3, Province No. 4, Province No. 5, Province No. 6, and Province No. 7.

Our civil projects have adhered to Department of Urban Development and Building Construction's and earthquake resilient design standards along with integrating child-, gender-, disabled-, MHM- friendly elements and principles. GNI Nepal has also extended support for renovating and restoring extant infrastructures. To increase ownership of the communities and optimal utilization of local resources, community contribution was actively sought for all civil projects.

In the earthquake-hit districts of Gorkha, Nuwakot, and Parbat, we have completed health posts, outreach clinics, drinking water schemes, and schools with support from our donors. Restoration and rehabilitation of impaired 'infrastructures' has been critical in the recovery of livelihoods and basic services in those districts.

This photo-book includes photos and brief information of newly constructed, reconstructed, and renovated school buildings, gender-friendly toilets, health posts and outreach clinics, maternity wards, cooperative buildings, collection centres, cellar centres, canals, fencing/retaining walls and other civil works that we completed in 2017 and 2018.

Good Neighbors International along with Korea International Cooperation Agency, United Nations World Food Programme, and Good Neighbors Japan funded these projects.

- 5 school buildings constructed
- 4 metal wire fences erected
- 4 health posts constructed
- 5 outreach clinics constructed
- 47 drinking water systems constructed
- 20 gender-friendly toilets constructed
